

## Virtual Meeting Systems

---

### Slack

Slack is an instant messaging platform. SciLifeLab has a license for this service. Anyone registering an account on Slack, using their @scilifelab.se or @scilifelab.uu.se-addresses will be connected to the SciLifeLab workspace. More than 500 SciLifeLab-addresses are already registered.

#### When to use?

Instant messaging to your colleagues. Internal communications. Virtual calls and meetings within the SciLifeLab community.

#### Learn more and download

<https://slack.com/intl/en-se/downloads/>

---

### Zoom

Zoom is a software-based conference room solution. This is procured by SUNET and available through most Swedish Universities.

#### When to use?

Video conferences, both internal and external callers.

#### Learn more and download

<https://zoom.us/download>

---

### Pexip - Virtual Conference Rooms

System for Virtual conferences. Book your virtual room in the Campus Solna Room Booking system. 5 parallel virtual rooms are available.

#### When to use?

Video conferences, with both internal and external callers.

#### Learn more and download (Pexip Infinity Connect)
