

SciLifeLab

SciLifeLab (Science for Life Laboratory) is a centre for the advancement of molecular biosciences in Sweden.

We provide access for thousands of researchers to the cutting-edge instrumentation and deep scientific expertise necessary to be internationally competitive in life science research. This infrastructure is supported and developed by our research community, including internationally recognized experts in life science and technology.

SciLifeLab started out in 2010 as a joint effort between four universities: Karolinska Institutet, KTH Royal Institute of Technology, Stockholm University and Uppsala University. Today, we support research activities at all major Swedish universities.

SciLifeLab

SciLifeLab (Science for Life Laboratory) is a national resource of unique technologies and expertise available to life scientists, closely intertwined with our community of researchers in areas such as data-driven life science, biomedicine, ecology and evolution.

We bring scientists together across traditional boundaries and foster collaborations with industry, health care, public research organizations and international partners.
