

## Tuesday, March 12

**CELLINK** is the leading provider of 3D-bioprinting solutions. Whether you are working with drug discovery, regenerative medicine, or complex tissue models, we are supporting you towards the future of medicine.

**Fisher Scientific**, a premier distributor, offers an extensive product showcase. Meet with your dedicated account managers, explore digital solutions, gain insights on account setup, and learn more about products with specialists.

**Hettich Labinstrument AB** - Leverantör av labinstrument och service

**Integra**, we accelerate science together. The Ambition To Make Pipetting More Productive

**Proteintech**, founded 2001, is a leading manufacturer of antibodies, proteins, immunoassays and nanobodies. All products are in stock and available for next-day delivery.

**Rarity** superRCAs are ultrasensitive multiplex assays for detecting rare nucleic acid sequences in biological samples. The superRCA assay enabling full potential of liquid biopsies and radically improving cancer diagnostics.

**Saveen & Werner AB**, our goal is to be a one-stop-shop for every laboratory in the Nordic countries. We provide glass ware, chemicals, consumables, instruments, molecular biology and tissue culture products.

**STEMCELL Technologies** provides high-quality cell culture media, cell separation technologies, instruments, accessory products, and educational resources to scientists around the world working on stem cell, immunology, cancer, regenerative medicine, and cellular therapy research.

**World Courier** specializes in tailored transport solutions. Time and/or temperature-sensitive shipments, Research samples, Advanced therapies, Pharmaceuticals, Clinical studies, Biological materials. Packaging material from -200c to +25c

**YSDS** provides global logistics solutions for clinical trials, advanced therapy, biotech and more. GDP certified solutions for your time and temperature sensitive products, with full end-to-end visibility.

## Wednesday, March 13

**AB NINOLAB** represent approx. 60 foreign companies in these areas:  
• Heating, cooling and climate control • Washing and sterilization • Water and air purification and clean rooms • Sample preparation, weighing and control products • Biotechnology • Project sales/installations/technical service

**Akoya Biosciences** offers comprehensive single-cell imaging solutions that allow researchers to phenotype cells with spatial context and visualize how they organize and interact to influence disease progression and response to therapy

**Hamilton Nordic** is a world leader in automating liquid handling. We can help you with all your automation project, small and big.

**LabTeam Scandinavia AB** arbetar med konsulttjänster och försäljning av laboratorieutrustning, förbrukningsmaterial samt service/tjänster på labinstrument. Vi har bland annat centrifuger, ultracentrifuger, labkylar, labfrysar, gnistfritt, medicinkylar, medicinfrysar, lågtempfrysar, frys racks, kryoboxar, frystorkar, vattenbad, kyl/värme-cirkulatorer, med mera

**MacroGen** - Technology, knowledge and professionalism combined to offer customized sequencing services in Next-Generation and Sanger sequencing. For example: WGS, WES, WTS, spatial transcriptomics, scRNA, Metagenome, targeted/amplicon and epigenome sequencing.

**Nordic Biolabs AB** is a distributor representing more than 70 suppliers in Sweden. We have products for cell culture, molecular biology work and much more.

**PacBio** is a life science technology company that is providing advanced sequencing solutions that enable scientists to improve their understanding of the genome and ultimately, resolve genetically complex problems.

**QIAGEN** delivers Sample to Insight solutions for molecular testing and offers products and services that enable our customers to gain valuable insights from any biological sample – from basic research to clinical healthcare.

**Shimadzu** provides a broad range of analytical instruments indispensable for research, development, and quality control in a variety of fields.

**Tecan** is a Swiss company founded in 1980 and is a world-leading provider of automated solutions / systems for laboratories in research, development and routine analysis. We develop, manufacture and distribute our own products worldwide.

## Thursday, March 14

**10x Genomics** offers end-to-end single cell and spatial solutions include instruments, consumables, and intuitive software, letting you unravel intricate biological systems, while bringing into focus the details that matter most.

**BioNordika**, your local Life Science supplier. We believe it should be easy to order and get technical support. All of our Product Specialists are former scientists. Let us help you

**GenScript** is the world's leading technology and service provider of life science R&D, GMP and manufacturing.

**Integrated DNA Technologies (IDT)** are experts in oligo synthesis and supports NGS, DNA amplification, genotyping, genome editing, expression profiling, synthetic biology, and functional genomics.

**Nordic Biosite** is a supplier of products for research & diagnostics throughout the Nordics. Let's talk about your workflow for Genomics and Transcriptomics, antibodies available in BULK, and services.

**PeptoTech** is specializing in cytokine products and providing service to the life science and cell therapy markets. E.g. Recombinant Human, Murine and Rat Cytokines, Animal-Free Recombinant Cytokines, GMP Cytokines, Antibodies and ELISA Kits.

**Science Imaging Scandinavia AB** distributes selected Life Science Products

**Takara Bio** support a wide range of applications including e.g. CAR-T therapy, immune profiling, genetic screening, cell and gene therapy, infectious disease research, vaccine development, drug discovery, antibiotic-resistance screening, and cancer research.

**Techtum Lab**, a distributor of cutting-edge laboratory equipment and solutions for molecular biology research will exhibit at BMC Navet October 5. Live demos of a selection of our instruments!

**Thermo Fisher Scientific** - Invitrogen cell, protein, and molecular biology technologies range from Lipofectamine reagents, TOPO cloning kits, SuperScript and Platinum enzymes, to western blotting technologies, antibodies, and the GeneArt Gene Synthesis service.
