

Welcome

Full Cost Calculations Infrastructure Users - Webinar

Monday 2025-06-16, 13:00–14:30

Zoom

- Recording for internal use/notes
- Slides will be shared after at webpage
- Questions after each session and in the end

The SciLifeLab Industry Access project

Vision

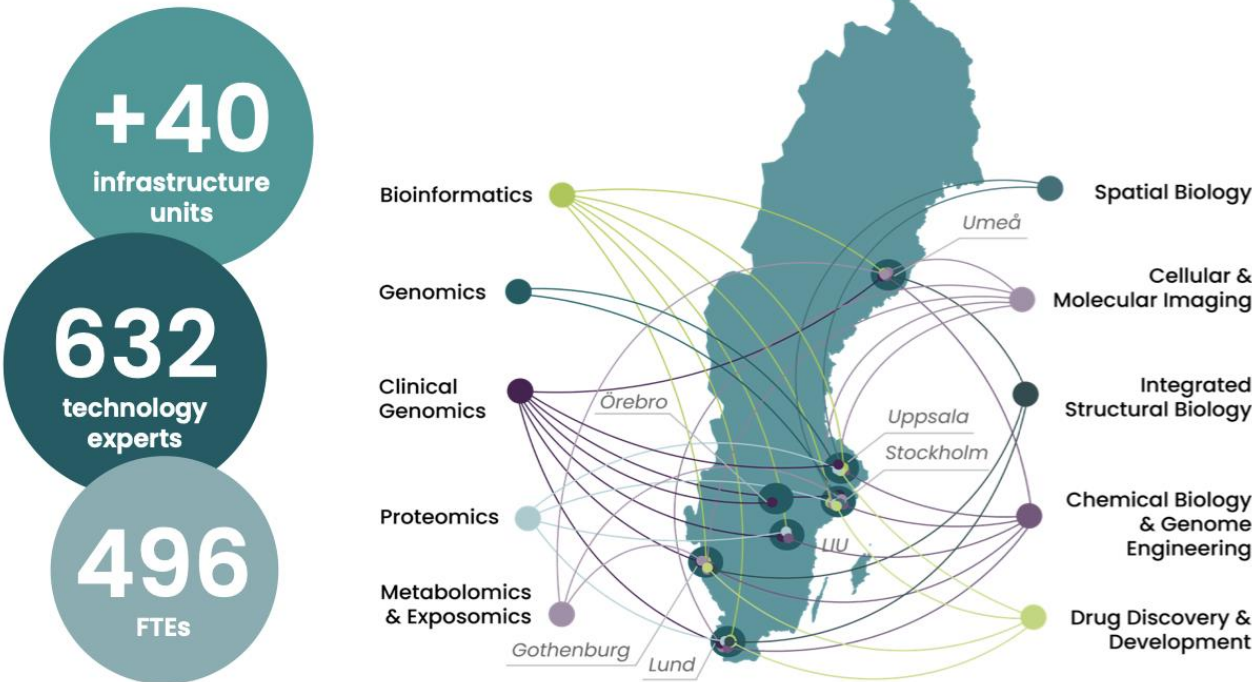

Traditional

SciLifeLab Multi-modal, multi host

SciLifeLab infrastructure by the numbers

Infrastructure numbers and distribution of platform operations across 11 Swedish universities.

SciLifeLab units are very different in size regarding number of Full-time equivalent (FTE:s).

Size of Swedish companies using and/or collaborating with the SciLifeLab Infrastructure

Infrastructure users industry perspective

- 150 unique projects affiliation industry
- 106 different companies

- Not always “easy” from Head of unit or industry perspective
- New ordinance of fees for service (“förrordningen”) – what does it mean?

Project to focus specifically on SciLifeLab:s offering and challenges with industry users

SciLifeLab Industry Access – project

2024-2026, PL: Josefin Lundgren Gawell and Per Lek, External Relations

- **Stärkt konkurrenskraft med ökad tillgång för näringslivet till SciLifeLab:s forskningsinfrastruktur.**

- **Strengthened competitiveness with increased access for industry to SciLifeLab's research infrastructure.**

- GOAL 1: Best Practice Guidelines for contracts between SciLifeLab units and industry users.
- GOAL 2: Best Practice Guidelines for pricing of SciLifeLab:s infrastructure.
- GOAL 3: Implementation of guidelines through purposeful internal and external communication.

Workshops

Each site and/or “responsibility” area

- SciLifeLab Head of Unit ++
- University-Infra-responsible
- University – Legal capacity
- University – Economy capacity

Outreach

- External fairs/conferences
- Infra-Industry webinar
- Match making at SciLifeLab events

Information

- Project info and guidelines on scilifelab.se

Survey results

Full cost model & calculations

All SciLifeLab units have a full cost model, as stated in the general terms and conditions.

Are you confident with your full-cost model and how to implement it?

Is there a need for (more) support from the university to update the full cost model?

Is the cost model developed with economic support from a university controller?

Do you know who to contact for help with pricing calculations at your university?

Conclusion

55% of the units state more help is needed regarding full cost calculations.

The respondents that replied they need more support and/or don't know who to contact for help with pricing calculations came from 8 different universities, indicating that it is relevant to establish these contacts at all universities.

Action: connect the head of units in need of more cost and pricing support within their own university
