

EXPLORING BIOLOGY WITH SMALL MOLECULES AND OPPORTUNITIES FOR EARLY DRUG DISCOVERY

Join the webinar

Friday September 5, 12:00 to find out more about our services

Open call for project support within our service areas – from assay development and small molecule screening through drug profiling to medicinal/synthetic/organic and computational chemistry support. Visit CBCS.se for more information.

Drug Discovery and Development Platform

Turning Discoveries into Innovations

Call for new project proposals for drug discovery. DDD supports a project portfolio consisting of about 20 programs and we foresee a need to replenish our portfolio with 3-5 new programs in 2025. We are interested in programs with defined targets for diseases with medical needs using any therapeutic modality, e.g. antisense oligonucleotides, small molecules, antibodies and/or proximity-inducers.
